

Announcement of the Annual Competition for
the

Aladdin Lamp Award

PURPOSE: To recognize excellence in synchrotron radiation research performed at SRC in pursuit of a degree.

ELIGIBILITY: Any student performing a significant piece of research at the Synchrotron Radiation Center as part of an educational program. There is no restriction on level of degree at this time. The nominee should have been a student at SRC within two years of the nomination deadline.

APPLICATION: A complete application will consist of the following parts:

1. A brief letter of nomination from the applicant's advisor. This letter should clearly state the role of the applicant in the research project.
2. An extended abstract (4 page maximum, including figures) of the work performed at SRC, written by the applicant.
3. The applicant's curriculum vitae including publications and works in progress.

AWARDS: Applications will be judged by a committee that will invite up to three of the best applicants to give a talk at the SRC Users Group Meeting. Factors in the assessment are the impact of their SRC research, their contribution to the SRC community, and the quality of their oral presentation. The committee will select the awardee from the finalists after they have given their presentation. The awardee will receive a \$250 award and an award plaque.

DEADLINE: Completed applications are due by September 28, 2007.
